Mission Springs Water District
Temporary Construction Meter (Fire Hydrant Meter)

Please read the following regulations pertaining to the use of a temporary construction meter.

1. Upon receipt of the application and deposit, Mission Springs Water District requires **at least a 24-hour notification** before the installations is made.
2. Requests to move the temporary meter must be **at least 24 hours** in advance of the relocation.
3. Only **approved** fire hydrant spanner wrenches are to be used on the hydrants. **The use of pipe wrenches, channel locks or vice grips is prohibited.**
4. Hydrants valves, gate valves, ball valves or any other valve **must be** opened and closed slowly.
5. The operator is prohibited from installing or using any type of quick closing valve or other device that can cause a water hammer or an abrupt change in pressure.
6. The use of fire hoses or any hose that leaks is prohibited.
7. All water vessels must be properly **air gapped** as described in **Title 17** of the **California Department of Public Health Code.**
8. The temporary meter cannot be removed, relocated or stored without the written permission of Mission Springs Water District.
9. The operator is responsible for all appurtenances connected to the temporary meter.
10. The operator must report in a timely manner any damaged, leaking or faulty part to Mission Springs Water District.
11. Mission Springs Water District reserves the right to throttle any valve to a specific rate of water flow at any time.
12. Mission Springs Water District reserves the right to deny use of its facilities to any party who knowingly violates any of its rules or regulations.

I have read the regulations above and understand the temporary construction meter may be disconnected if I violate any of these regulations or any other rules and regulations of the Mission Springs Water District.

By: _____ Date: _____

Note: Mission Springs Water District rates for Temporary Service are Monthly Service Charge is \$30.00 and Water Consumption Charge is \$1.85 per 100 cubic feet of water.
